

## IFRS – Accounting

15<sup>th</sup>–17<sup>th</sup> April  
2010

Tallinn  
Estonia

Valuation in the context of general purpose accounting is one of the key tasks of actuarial work. More and more companies have to be familiar not only with the national GAAP, but also with the requirements regarding IFRS. The “current” and “market-consistent” measurement integrates a lot of different actuarial techniques and tools that are used in the actuarial practice, i.e. stochastic modelling, margin techniques, data collection, embedded derivatives, hedging methods etc.

## Actuarial Modelling

6<sup>th</sup> – 8<sup>th</sup> May  
2010

Vienna  
Austria

This seminar will go back to the basics of actuarial models, explore the shortcomings of popular techniques, and equip participants with a better understanding of how models should be applied in practice. The course is based on the aspects of actuarial modelling that constitutes a prerequisite to become a fully qualified actuary in many European actuarial associations, taking into account the core syllabus of the International Actuarial Association.

## ALM in the Context of an Efficient Risk Management

27<sup>th</sup> – 29<sup>th</sup> May  
2010

Sofia  
Bulgaria

The seminar will present the relevant techniques used in the Asset-Liability-Management. ALM is the central function within an efficient risk management as it is able to balance the structures of the asset side as well as of the liability side simultaneously and is offering an integrated approach in which both risk and return are taken into account. Besides the needs in life insurance, the seminar will concentrate especially on non-life insurance against the background that ALM will influence increasingly the risk management even in this sector of business.

## Series on Enterprise Risk Management Part I and II

15<sup>th</sup> – 20<sup>th</sup> March  
2010
